

LOUNGE

LOUNGE sauna, external cladding wenge wood with glass corner, system panel for storage and towel, clothes hooks and TOUCHCONTROL control unit.

LOUNGE sauna, internal cladding hemlock panels, COLOURED LIGHT with LIFTLIGHT, SUNSET indirect lighting and MAJUS heater.

A model we have sweated long and hard over. In the case of LOUNGE, building a sauna to the highest standards has involved placing a particular emphasis on the highest possible quality of interior design. For this reason, the only wood we were prepared to consider for the wall cladding was pure and knotless hemlock. Whether used in the generous panelling seen here or in the classic SOFTLINE profile, the wood from this Canadian hemlock fir creates a elegant look no other wood can match, as well as providing a salubrious bathing climate. The successful combination of chic and sensible elements has resulted in a sauna which is ready to show you how great it is to work up a sweat. Something best done on a regular basis.

LOUNGE

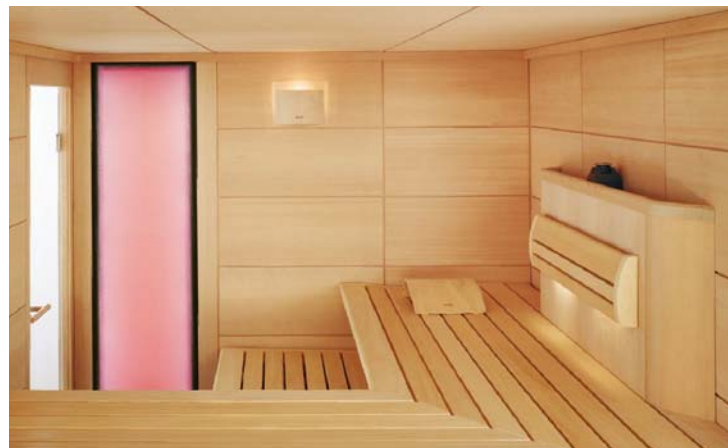

Your input is requested for the external design of the LOUNGE sauna. Choose from a range of doors and windows (to obtain the right level of transparency) and design the room-high external cladding in line with your own taste too. Continuous hemlock panels or classical wooden casing, natural or white varnished spruce, the whole thing in dark wenge wood or completely in white, with frameless glass fronts straddling the corners – there are plenty of decisions to be made. Shelves, storage racks and towel hooks provide you with further opportunities to make an individual mark. As far as the interior is concerned, we have taken

these decisions for you: clear forms, simple elegance, perfect workmanship are the order of the day here. A "Zen inspired" interior, providing emotional relaxation, even if plenty of exciting innovations are in evidence. Benches which seem to float on air. Back rests featuring mitre cut corners. Avant-garde style head rests, made from a single piece of wood. Further innovations include the splendid door handle and a light made from wood and glass. The harmonious coordination of all the elements involved generates a roundly balanced mood which enjoys the comfortable support of high-quality technology.

Sauna LOUNGE, internal cladding hemlock panels, BONATHERM VS SANARIUM®, SUNSET indirect lighting.

BELLAVEDA extra (page 114) and ergonomically shaped back rests, lit.

LOUNGE

In the interests of making a sauna in the LOUNGE an unforgettable experience for one and all, we have summoned up all our craftsmanship ability. There are, for example, the innovative benches, particularly roomy on the mid-level. Owing to their ergonomic form, the sauna benches are especially comfortable. It remains, however, up to you to make your choice from the wide range of useful extras to put the final incomparable touches in keeping with your taste. This cabin may, for example, be upgraded with a SANARIUM with SaunaPuk® (page 62) or the TOUCHCONTROL con-

trol unit (page 134). The hemlock internal cladding may be classically designed or feature panelling as shown here. In addition, a wide range of additional fittings is available: backlighting for the back rests can conjure up a whole new atmosphere in the cabin. The AQUAVIVA light and sound panel, the variations provided by the COLOURED LIGHT or the contemplative STARRY SKY will also lend your dream sauna a personal note. Information on further beautiful and convenient additional products is available in our extra section starting on page 106.

LOUNGE head rest.

LOUNGE Q Sauna with glass front and TOUCHCONTROL control unit.

Internal cladding in horizontal hemlock panels, POLAR STARRY SKY, SUNSET indirect lighting and SANARIUM® MAJUS heater.

A highlight deserving your full attention. The interior cladding of the LOUNGE Q features hemlock panelling which extends across the entire length of the sauna. This lends the interior a particularly high-quality character and guarantees you the most pleasant of sauna bathing experiences. Only one thing now remains which can make a LOUNGE even more stylish: your own four walls. We mean that quite literally. On request, we will be happy to integrate your sauna into the spatial surroundings of your own home in a completely individual manner. The version shown features a glass front and has been amalgamated with an existing natural stone wall to ensure harmonious integration into the surrounding ambiance. Relaxation does not get any better than this.
